*Price, Quality and Service Matter*

April 28, 2026

Dear Valued Authorized Dealer,

We want to inform you of an upcoming price adjustment effective Monday, May 4, 2026, impacting non-cased goods items, including upholstered products and mattresses.

Due to a recent fire at the Bayport Choate plant, the world's largest producer of propylene oxide which is a key chemical used in the production of polyurethane foam. Significant cost increases have affected foam and related upholstery components throughout the industry. As a result, manufacturers and suppliers both domestically and abroad are implementing price increases across the board.

While these market conditions have made adjustments necessary, PFC Furniture Industries is committed to keeping this increase at an absolute minimum and is sharing in the burden of these rising costs with our authorized dealers rather than passing along the full impact. Our intent is to make these changes with the least possible disruption to your business.

These price changes will be applied directly to affected items, and every effort has been made to limit the overall impact while continuing to provide the quality, value, and service you expect from PFC.

We appreciate your understanding and continued partnership as we navigate these industry-wide challenges together. If you have any questions regarding the upcoming adjustments, please contact your PFC sales representative.

Thank you for your continued support.

Sincerely,  
PFC Furniture Industries
